Education In Love

# Understanding God's Loving Laws

Foundation Principles

## Economy & Function Principles

| | |
|---|---|
| Series: | **Education In Love** |
| Group: | **Understanding God's Loving Laws** |
| Theme: | **Economy & Function Principles** |
| Presenter(s): | **Jesus** |
| Description: | **Jesus briefly summarizes God's Principles of Economy & Function that govern the operation of God's Laws, gives examples of the way these principles are built into God's Laws, and answers audience questions about the principles** |

| **Economy Principles** | |
|---|---|
| **Summary** | **Economy principles ensure that each creation and law economically uses resources by ensuring:**<br>The equal value of resources (time, matter and energy)<br>The economical use of resources to create function<br>The automation of laws and creations (no external maintenance)<br>Economy is incorporated within creation and law |
| **Definition**<br>(What the principles are) | The law shall consider time, matter and energy as *resources* of equal value<br>The law shall utilise all *resources* economically<br>The law shall be automatic and does not require external maintenance<br>The law shall be incorporated within the creation itself<br>The law shall benefit all creation |
| **Objectives**<br>(Why the principles are applied to law) | To ensure all *resources* combined are treated with equal value<br>To ensure all *resources* combined are utilised efficiently for abundance<br>To ensure all systems are sustaining, self-maintaining and self-repairing<br>To ensure the individual creature is supported by creation collectively<br>To ensure humans understand benefits of collective economy |
| **Application**<br>(The creation and laws affected) | Every law<br>All matter living and non-living |
| **Reveals**<br>(What the principles reveal about God) | God feels time, matter and energy are equally valuable<br>God feels economy and abundance are mutually inclusive<br>God feels economy results in abundance for all creatures<br>God's economy is not motivated by a feeling of lack<br>God feels that love does not waste anything (we can think about this in terms of physical creation but also in terms of emotional and spiritual experiences)<br>God focuses on the real benefit rather than any short term "satisfaction" |
| **Examples**<br>(The principles' applications in law) | **Gravity**<br>One law has the same benefit to all living creatures.<br>**Aerodynamics**<br>Knowing the higher law results in more economical use of time, energy and resources to accomplish larger outcomes (particularly if we redesigned the vehicle to have more loving energy sources and operation would result in no roads or destruction to environment through transportation). |

| Economy Principles (cont'd) | |
|---|---|
| **Examples**<br>(The principles' applications in law) | **Automation**<br>Instinct built into each living creature. Default operation built into all matter. e.g. Breathing; living organisms do not require decisions to breath.<br>**Decomposition**<br>A decomposing tree creates fertile ground to sustain more life, food for insects, birds, animals and other living elements of the system, a pocket of light that allows smaller trees that were previously shaded to grow. |
| **Conclusion** | **Economy principles:**<br>Ensure all laws and creations economically use, and treat of equal value, all resources of time, energy and matter. Economy principles ensure that no resource is wasted, and that abundance exists naturally within the universe.<br>**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose economy principles including:**<br>Placing financial matters ahead of time, matter and energy, creating without consideration for future resource usage, creating without concern for creatures that live afterwards, watering gardens, using chemicals that destroy, selfishly valuing my personal resources over the resources of others, etc |

| Function Principles | |
|---|---|
| **Summary** | **Function principles ensure that each creation and law has many functional purposes by ensuring:**<br>The equal value of outcomes (results, beauty, and the use of resources of time, matter and energy)<br>Each law and creation has multiple functions that are automatically fulfilled<br>The economical use of resources to create multi-functionality<br>The automation of function and outcome<br>Creation itself instinctively "desires" to fulfil all outcomes |
| **Definition**<br>(What the principles are) | The law shall quantify the economical use of resources (time, matter and energy), the obtained results, and beauty as *outcomes* of equal value<br>The law shall ensure all *outcomes* are automatically fulfilled<br>The law shall ensure creation itself instinctively "desires" to fulfil all *outcomes* |
| **Objectives**<br>(Why the principles are applied to law) | To ensure all *outcomes* combined are treated with equal value<br>To ensure all *outcomes* combined are fulfilled<br>To ensure each creation itself fulfils all *outcomes*<br>To ensure each creation supports a system that fulfils all *outcomes* |
| **Application**<br>(The creation and laws affected) | Every law<br>All matter living and non-living |
| **Reveals**<br>(What the principles reveal about God) | God feels the only purpose of law is to create and enhance function<br>God sees no point in creating without function or for beauty only<br>God feels beauty is an inviolable part of loving function<br>God enjoys function and beauty as mutually inclusive<br>God creates function to inspire, satisfy, and increase the joy of the human soul |
| **Examples**<br>(The principles' applications in law) | **Gravity**<br>Gravity keeps all unconnected matter sustained within an atmosphere, and the atmosphere itself is sustained by gravity (along with other substances) |

| Function Principles (cont'd) | |
|---|---|
| **Examples**<br>(The principles' applications in law) | **Aerodynamics**<br>While only recently enjoyed by the human itself, birds and other creatures (insects, etc) have engaged flight that benefits humans (e.g. fly, ant, bee) collectively, and inspired humans (e.g. bird of prey) to learn the law.<br>**Trees**<br>Trees have a multitude of functions, which include assisting survival and the creation of a usable atmosphere, habitat, heating, oxygen generation, removal of carbon dioxide, soil production, water management, as well as smelling good, supplying calming energy, and being beautiful to look at for humans.<br>**Every human specific law**<br>Each human specific law has multiple functions of removing sin, causing transformation, as well as making the human itself feel, smell and look more beautiful. |
| **Conclusion** | **Function principles:**<br>Ensure all laws and creations have multiple functional purposes for their creation and existence, and treat of equal value, all resources of time, energy and matter, and all outcomes including function and beauty. Function principles ensure that each creation has multiple purposes and that each purpose benefits other creations.<br>**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose function principles including:**<br>Not valuing resources (time, matter and energy), the obtained results, and beauty equally, creating without function, creating for a single function, destroying the environment to create, creating products that cover over truth (e.g. makeup for women), etc |

## *Economy & Function Principles Q&A*

### *Use the morning as an opportunity to formulate my questions*

Examine the "Economy & Function Principles" outline
Think & feel about what I would like to ask

### *I want my questions to be to the point, succinct and direct*

Stop telling stories, raise the issues directly
Stop parroting what I think, rather than asking Jesus what I want to know
Use the microphone properly

## *Questions About*

### *Economy Principles*

What the principles are
Why the principles are applied to law
The creation and laws affected by the principles
What the principles reveal about God
Examples of the principles' applications in law

### *Function Principles*

What the principles are

Why the principles are applied to law
The creation and laws affected by the principles
What the principles reveal about God
Examples of the principles' applications in law

## *Questions Answered*

***00:36:17 Deidre Amos***
If God feels that time, matter and energy are equally valued why do we feel so much pressure about time?

***00:40:40 Deidre Amos***
Did God create night and day, but humans create time?

***00:42:41 Jane Stein***
Please explain how "God does not waste spiritual or emotional experiences"

***00:48:12 Natalie Mann***
Can you explain how Economy & Function is incorporated within the human?

***00:50:03 Natalie Mann***
Is it emotions that prevent us from seeing resources equally?

***00:52:49 Patty Matthews***
Does God consider art to be functional?

***01:01:55 Loise White***
Can music be functional?

***01:03:34 Arvarna Lowe***
Are there any penalties for creating things without loving function?

***01:04:38 David Raizman***
How is God able to achieve a high level of consistency in automation?

***01:08:21 Felix Hogel***
What are considerations of making and using AI to have loving functionality?

***01:09:53 Felix Hogel***
Are you saying that creating a robot will always have a loving purpose?
