Soul Specific Principles

# Human Transformation Principles

| | |
|---|---|
| Series: | **Education In Love** |
| Group: | **Understanding God's Loving Laws** |
| Theme: | **Human Transformation Principles** |
| Presenter(s): | **Jesus** |
| Description: | **Jesus briefly summarizes God's Principles of Human Transformation that govern the operation of God's Laws and determine the human soul's future potential, and gives examples of the way these principles are built into God's Laws** |

| **Human Transformation Principles** | |
|---|---|
| **Terms** | ***Hierarchical universes*** can be constructed, each one governing and containing multiple universes of the lower hierarchical type.<br>***Physical universes*** are the lowest human based *hierarchical universes* and are the physical and spiritual universes (complete with all spheres) able to be perceived through the senses of the physical and spiritual bodies.<br>***Soul universe*** is the current highest human based hierarchical universe. It can only be perceived by the soul senses of a soul in a self-aware state and also contains unaware souls ready to incarnate.<br>***Transformation*** is the potentiality offered to the human soul with sincere and passionate desire to exceed its original created condition and potentials as a human, and to allow God's Personal Love to be absorbed by the soul in order to transform the soul into an immortal Divine creature with the potential of infinite expansion (but not infinite as God is). Transformation principles are the most complex of all of God's Principles. |
| **Summary** | **Human Transformation principles:**<br>Allow desire driven transformation from the human soul into a Divine soul<br>Allow desire driven absorption of God's attributes by the human soul<br>Allow the entire soul (both halves) to join in full self-awareness<br>Assign the gift of immortality to the human soul who transforms<br>Assign the potential of infinite expansion and expression to the human soul |
| **Definition**<br>(What the principles are) | The law shall enable the transformation of the human into the Divine<br>The law shall offer the potential of immortality<br>The law shall offer other Divinely infinite potentials to the human soul<br>The law shall enable the soul to create ever increasing new universes to allow for the soul's infinite expansion and expression |
| **Objectives**<br>(Why the principles are applied to law) | To create the **external** potential for every soul to understand God and receive communication and substances from God<br>To create the **internal** potential in every soul to understand God and receive communication and substances from God<br>To ensure the soul with desire can expand in its internal capabilities and awareness enough to grasp, understand, receive communication and substances from God<br>To allow the soul with desire to have indisputable proof of God's Personal Love and also, as a result of receiving God's Love, God's Existence & Character<br>To ensure the soul with desire can complete the necessary transformation required to become Divine |

| Human Transformation Principles (cont'd) | |
|---|---|
| **Objectives**<br>(cont'd) | To allow substantive parts of God's Attributes and Character to be absorbed by the human soul<br>To ensure the human soul is able to become immortal<br>To ensure the human soul has infinite potential<br>To ensure the whole soul can become self-aware |
| **Application**<br>(The creation and laws affected) | All laws governing the human soul's expression of desire<br>All laws governing the potential of the human soul<br>A secondary affect on all laws and all creation |
| **Reveals**<br>(What the principles reveal about God) | God's Love is infinitely generous<br>God's Love does not force transformation upon unaware souls<br>God's Love responds to sincere desire and longing<br>God has a personal interest in each person and their happiness<br>God desires humans to understand what God feels like<br>God desires humans to become immortal (guarantees living forever)<br>God has principles and laws that govern the flow, reception and transmission of love from any source<br>God desires to share God's Attributes and Substances with all of her children<br>God desires open communication with all of Her children |
| **Examples**<br>(The principles' applications in law) | **Prayer**<br>Prayer is not governed by laws that contain any universe. Since prayer begins in the soul and enters the soul of God (who is not contained within any universe but who contains all universes and potential universes infinitely), the laws that govern transformation of the human soul are beyond all universes. Transformation principles enable laws governing prayer to exist and to operate in and outside of the laws governing all universes.<br>Prayer is an emotion felt within the soul, but since the soul is connected to the two bodies, prayer feels like it is coming from the bodies.<br>If prayer was coming from the brain existing within the body, and was bound by the currently discovered laws of the physical universe and operating at the speed of light, and if God was only as near as the nearest star, it would take 8 years to transmit the prayer from the body to God, and another 8 years to receive a reply.<br>**Reception of God's Love**<br>God's Love exists outside of all universes. Transformation principles allow God's Love to be received by souls who perceive themselves to be within the physical universe, and allow those souls to gain awareness of the union condition and expand beyond the soul universe into ever increasing universes of larger size.<br>**The unaware soul**<br>The unaware unified soul does not and cannot exist within the physical universe. The unaware soul remains within the soul universe while connecting into 2 pairs of bodies (physical and spiritual) through the instinctual incarnation process in order to engage in the embryonic stage of learning about itself.<br>The physical and spiritual bodies are required by one half of the soul in order for the soul half to experience the physical and spiritual universe. This allows the soul half to be educated about love, inter-dependence, masculinity and femininity, and a huge number of other topics. |

| Human Transformation Principles (cont'd) | |
|---|---|
| **Examples** (cont'd) | **Soul union condition**<br>Soul union is the condition of being completely self-aware as a unified soul. The physical and spiritual bodies cannot enter the soul universe, but the soul, due to Transformation principles not only exists in the soul universe, but potentially can expand into ever increasing hierarchical universes made from different substances and having a larger size but still contained within the infinite. |
| **Conclusion** | **Human Transformation principles:**<br>Human Transformation principles are the most highly complex principles governing God's Laws and God's Highest Creation, create laws that exist outside of all current universes, and also outside of any new potential universes that could exist.<br>Desire for and reception of God's Love is the human controlled mechanism by which transformation of the soul into a Divine creature occurs, and the transformed soul becomes completely self-aware, is assigned the gift of immortality and has the potential of infinite expansion and expression.<br>**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human transformation principles including:**<br>Rejecting God<br>Rejecting God's Love<br>Rejecting God's Truth<br>Rejecting God's Principles and laws<br>Rejecting faith<br>Rejecting the potential of a spiritual afterlife<br>Agnostic or atheistic beliefs<br>Religious beliefs in disharmony with God's Love and Truth<br>Wilfully engaging unloving behaviour<br>Desiring ignorance<br>Retaining human definitions of love<br>Desiring to remain self reliant<br>Believing 'I am God'<br>Arrogance, narcissism, and desire to hold onto current self perception<br>Holding onto emotions that resist the reception of love (from any source), etc |

## *Questions Answered*

***00:09:07 Bruce Carrigan***

In the clusters of universes you have illustrated with an earth at the centre, are they all surrounded by 35 spheres?

***00:10:27 Sherry Webster***

Are there other earths where people are more developed than we are on this earth?

***00:13:07 Natalie Mann***

Isn't the soul union state in the 21st sphere?

***00:13:58 Natalie Mann***

Does my soul operate and affect only this universe or does it also affect the rest of the universes?

***00:23:10 Jadda Jessop***

How much of God's Love do we need to receive before we are immortal?

***00:32:36 Raj Miles***

How does the Holy Spirit work in transmitting God's Emotion into the soul?

***00:34:41 Raj Miles***

Do I need to have a relationship with the Holy Spirit?

***00:46:55 David Raizman***

When we are in a unified soul state and we wish to travel to a lower condition do we separate into different spirit bodies?
