

The Human Soul

The Truth About Reincarnation

Introduction

What is reincarnation (or transmigration of the soul) as taught currently on earth?

Reincarnation, literally "to be made flesh again"

Karma is the fruit of your actions (what you sow you reap)

That each soul (person in a spirit body) incarnates into a human form in order to release Karma

That incarnation happens 100's or 1000's of time before Karmic release is complete

When Karmic release is complete, the soul has reached Nirvana (or paradise) and does not reincarnate

That the human soul incarnates into both female and male forms depending on Karmic issues

That the human soul may incarnate into animal forms depending on Karmic issues

Buddhism rejects the concept of "one eternal soul" and "self", but the soul is reborn into a different being

Buddhism rejects the concept of the Universal Creator (God)

Most other religious movements (including New Age) believe in "one-self"

Reincarnation is a central tenet within the majority of Indian religious traditions, such as Hinduism (including Yoga, Vaishnavism, and Shaivism), Jainism, and Sikhism. The idea was also entertained by some ancient Greek philosophers. Modern Pagans also believe in reincarnation as do New Age movements, followers of Spiritism, practitioners of certain African traditions, and students of esoteric philosophies such as Kabbalah, Sufism and Gnostic and Esoteric Christianity. The Buddhist concept of Rebirth differs significantly from the Hindu-based traditions and New Age movements in that there is no unchanging "soul" (or eternal self) to reincarnate.

Love Determines All Truth

Love will determine whether there is truth in the reincarnation teachings currently on earth

Truth will answer all questions logically regarding so-called "reincarnation evidence"

False "Reincarnation" Beliefs (examine from the point of view of Love)

That Karma (whatever you sow, you shall reap) is paid during many lifetimes

That the human soul reincarnates after a "life review" (that cannot be remembered) in the spirit world

That the human soul eventually becomes pure through a series of hundreds of incarnations

That the human soul cannot progress in the spirit world, reincarnation is the only form of progression

That the human soul reincarnates into female or male forms depending on Karmic debt

That the human soul reincarnates into a lesser form if the "Karma" has been regressive

That the human soul reincarnates into a more painful experience if the "Karma" has been regressive

That human life ultimately leads to or contains "pain and suffering" for purification purposes

That physical illnesses and genetic deformities and diseases are Karmic debt from past lifetimes

That the human soul is the spirit body

False "Reincarnation" Evidence

Children speaking "wisdom from old", remembering "past life" experiences, or imitating dead relatives

People with physical maladies that mirror the maladies of a person who has recently past

General memories of "previous life" experiences (mostly previous passing/death experiences)

Psychics or mediums sensing "previous life" personalities and experiences, talking of "old souls"

Psychics or mediums channeling information from spirits about past life memories of a client

People having instant emotional connections with other people that they have not previously met

Déjà vu experiences, and "Near Death" experiences

Past life regression therapy experiences and "Past Life" experiences under hypnosis

Some Negative Effects Of False "Reincarnation" Beliefs (there are many more)

Spirits in poor condition "trying" to reincarnate rather than work through soul emotional issues, or heavily influencing the person they are connected to by the person on earth's belief in reincarnation

Some are malevolent, and therefore very harmful to the person they are connecting to

All are generally unwilling to experience the effect of their own lawless actions when previously on earth

Many spirits want to continue their life choices (drugs, alcohol, sex, murder, rape etc) and influence the person on earth to act out their desires, and they remain "earth-bound" rather than progressing

Persons on earth being heavily influenced by spirits in poor condition by believing that they themselves were the spirit in a previous life

This often prevents the person on earth from fully facing his or her own emotional condition

The person on earth often justifies their emotional condition through the spirits experience

Practices that are based around beliefs in reincarnation, such as “Past Life Regression,” actually encourage deeper and more complete spirit influence

Many hundreds of spirits surround a “Past Life Regression” Therapist

These practices generally disconnect a person from their own emotions, and focus on the “past life”

These practices generally confuse a person already in emotional confusion

These practices encourage permanent links between a spirit in poor condition and a person on earth without the person on earth really being aware of what is happening

Many spirits sincerely believe in reincarnation as taught on earth, but as a result, fail to progress or find happiness for many centuries or millennia in the spirit world

When a spirit does progress from the 1st to 2nd sphere, the spirits left behind often feel confused and upset thinking the person has reincarnated

Many spirits in the 1st sphere and up to the 6th sphere teach reincarnation beliefs to mediums on earth

Teachings taught by these spirits often cannot be un-done easily

Many spirits in the 6th sphere are aware that reincarnation has occurred since 1962, but do not understand how, and their teachings impressed on earth cause more confusion (both in the spirit world and on earth)

Many of these spirits believe that reincarnation is the only way to “transform” the soul into a new creature, that reincarnation is the only way to the 7th sphere and above, have intensified their teachings that are misleading, and cause the truth of progression (Divine Truth) to be distorted

Many people on earth looking for an explanation of the pain and suffering on earth, have erroneously settled on reincarnation as an answer to their own difficulties

This distracts from working on emotions, and from developing a desire for Divine Love

Many spirits in lower development cannot see the guides and guardians that surround a person on earth, and so therefore assume that the feelings they feel surrounding the person are the persons “past lives”

A misunderstanding of truth therefore causes them to make assumptions that are false regarding reincarnation, and also regarding the so-called “past lives” of the person on earth

The Truth Regarding Soul Progression

Soul progression is possible from any location on earth, in the “hells”, or any other location in the spirit world

Soul progression is NOT dependent upon reincarnation, and is NOT linked to reincarnation in ANY WAY

Soul progression is only dependent upon the person growing in lessons of Natural Love or Divine Love

The Truth Regarding Reincarnation

Reincarnation is only possible once a soul has progressed into the Soul-Union condition

Soul-Union is only attainable after both halves of the soul have entered at-one-ment condition with God

Soul-Union requires each half of the soul to be born-again

The only motive for reincarnation is Love

Reincarnation is a free-will choice, and can only be performed once all soul “Karma” is released

Reincarnation on this earth began in 1962, and up until 1987 only 7 soul pairs reincarnated

Positive Effects Of The Truth Regarding Reincarnation

The truth causes us to take more self-responsibility in the following areas:

The clearance of our own emotions, the desire for God’s Love, the desire to live in love

The truth regarding reincarnation demystifies life, and adds hope

Love is magnified on earth by those who know the truth, rather than causing more confusion

People who return can teach Divine Truth and Divine Love from personal experience
